

AYOMIDE MATHEW ODUWOLE

Software Engineer

SUMMARY

Software Engineer with experience shipping production applications end to end — from system design to deployment and optimization. Built a full-stack research platform serving 10M+ papers and 300K+ job postings using React, Node.js, and a hybrid cloud architecture spanning Hetzner, Cloudflare, and AWS. Equally comfortable with data pipelines, CI/CD automation, and frontend development. Worked across Austin, Miami, and Nantes.

CERTIFICATIONS

Microsoft Azure Fundamentals

(AZ-900)

Data Science Professional Certificate

HarvardX

LANGUAGES

English	Native
French	Upper Intermediate
Yoruba	Native

SKILLS

Languages

Python · JavaScript · TypeScript · SQL · C++ · R

Frontend

React · Next.js · Tailwind CSS

Backend

Node.js · FastAPI · PostgreSQL

Cloud & Ops

AWS (S3·EC2·Bedrock·SageMaker·RDS) · Azure · GCP · Hetzner · Cloudflare · Vercel

DevOps

Docker · Kubernetes · GitHub Actions · CI/CD · Git

Data & ML

PyTorch · scikit-learn · pandas · NumPy · Hugging Face · LangChain

Analytics

Tableau · Power BI · Selenium · Web Scraping

Soft Skills

Quick understanding of new technologies
Time management and adaptability

EXPERIENCE

Software Engineer

04/2024 - Present

Gloreia

Remote

- Designed and developed a full-stack research platform using React and Node.js, taking the product from initial design to production deployment.
- Built scalable data pipelines to collect, clean, and process 10M+ research papers from multiple sources, with automated workflows to support continuous ingestion.
- Implemented similar ingestion pipelines for job data, enabling the collection and serving of 300,000+ job postings on the platform.
- Designed and maintained scalable microservices for user activity tracking, recommendation systems, and content delivery.
- Migrated infrastructure from Azure to a hybrid cloud architecture combining Hetzner (backend services and databases), Cloudflare (networking, caching, and R2 storage), and Vercel (frontend deployment).
- Implemented CI/CD pipelines to automate deployments, improve release reliability, and manage multiple environments.
- Led SEO optimization and integrated advertising solutions, contributing to the acquisition of the platform's first 100+ active users.

Data Scientist - Intern

02/2025 - 07/2025

Stealth Power

Austin, United States

- Fine-tuned Large Language Models to improve NLP applications.
- Built and integrated APIs to support real-time data flow across services.
- Collected, cleaned, and processed sensor, web, and user-generated data for modeling.
- Contributed to backend and frontend features using Python, React, Node.js, and SQL.
- Engineered and optimized complex algorithms to drive data-driven decision-making.
- Built an AI agent to automate querying databases and then building custom dashboards for stakeholders with just a single prompt to provide clear and actionable insights.
- Deployed models and pipelines using AWS cloud infrastructure.

DevOps Engineer

06/2024 - 01/2025

Nerds Support

Miami, United States

- Implemented CI/CD pipelines to automate testing and deployment across projects.
- Led data collection projects from various sources through API integration and web automation, ensuring data accuracy and efficiency.
- Conducted security audits and applied remediations to maintain compliance.
- Automated dashboard generation for operational reports in Power BI, improving data accessibility and decision-making.

Tutor

03/2024 - 05/2024

Ecole Centrale de Nantes

Nantes, France

- Delivered tutoring to 28 students in Python, Linear Algebra, and Analysis.
- Organized workshops and created customized lesson plans for academic support.

Web Developer - Intern

05/2022 - 08/2022

GeM Laboratories

Nantes, France

- Developed a Python wrapper for a high-performance C++ library used to solve partial differential equations by the infinite element method.
- Integrated the library into Jupyter Notebook to be useable for 7000+ students and educators.
- Presented weekly progress reports to stakeholders, ensuring transparency and alignment.
- Used Python, C++, SQL, Pybind11, Ubuntu, and Paraview for development and scientific visualization.

EDUCATION

B.Sc Double Degree in Big Data and Management

09/2021 - 2025

Ecole Centrale de Nantes And Audencia Business School

Nantes, France
